Of those samples, 98 tested positive for CWD, including 78 mule deer, six white-tailed deer, and one elk. This same rationale applies to 22 other state-run feedlots dotting the federal Bridger-Teton Forest, tracts administered by the Bureau of Land Management and state lands scattered across western Wyoming. Rowledge argues that Wyoming over the past 25 years has lost its way. No trivia or quizzes .
Original Title. The longest originate beyond the Buffalo Valley—the northernmost longest originate beyond the Buffalo Valley—the northern extreme of Jackson Hole—in a jumble of high ridges and soaring plateaus of the Teton Wilderness Area and Yellowstone National Park.
